Inflatable Air Cushion Packaging System
Overview of the WiAir 200 System:

- The Sircle WiAir 200 Inflatable Air Cushion Packaging System is the only table-top machine on the market designed for use in a small business. The WiAir 200 is built from the ground up based on the unique needs of the small pack and ship operation. The WiAir is designed for the environment that ships from a few packages to a few hundred packages each day.

- The WiAir 200 system is designed to replace packing peanuts with inflatable air cushions as a void-fill material. The WiAir 200 is a table-top unit designed to produce air cushions at the time and place they are needed. No need to store bulky back-up material or accumulate material in a dispenser of any type.
The Sircle WiAir 200 Inflatable Cushion Packaging System

Problems solved:

Packing peanuts

• Messy & hard to use (like herding Cats)
• High material handling cost
• High storage space consumption
• High in-bound shipping cost (UPS oversize rate)
• Unstable as a void-fill packing material

What if Air cushions could be made where they were needed and when they were needed? On demand?
The WiAir’s Major Benefits:

• Viable alternative to Packing Peanuts
• Low cost of ownership:
  • No material purchase requirements
  • No lease or rental payments
• Void-Fill Material Cost Savings
• Reduced Inbound Shipping Cost
• Less Storage Space Needed
• Lower Labor Cost
• Greater Package Content Protection
• Ease of Operation
The WiAir’s Major Features:

• Small Foot print (about one cubic foot)
• Two easy-to-use dial controls
• Portable (weighs only 33 lbs)
• Operates unattended
• One film roll produces variable sized cushions
• 328’ film roll produces 50 cubic feet of void-fill
• Solid-state, gear-driven construction
• No maintenance or replacement parts required

![Graph showing total cost per cubic foot for different materials. The graph compares Peanuts, Bubble Wrap, and WiAir Cushions. Peanuts have the highest cost, followed by Bubble Wrap, and WiAir Cushions have the lowest cost. The graph visually demonstrates the cost efficiency of using WiAir Cushions.](image-url)
Cushion Size Selector:
- Choose desired cushion length
- Small = 4” X 8”
- Medium = 8” X 8”
- Large = 12” X 8”

Power:
- On / Off switch

Start / Pause:
- Start making cushions
- Pause making cushions
Film Length:

- Choose how many meters of film to run at a time.
- Select between 1 and 5 meters.
Film Roll Specs:
- 328 feet of film per roll
- 2.0 mils thick
- Low-density polyethylene (biodegradable)
- Inflatable tube stock
- Roll weighs 4 pounds
- Converts to 50 cubic feet of void-fill
- 4 rolls per master carton
- Shippable single rolls
- UPS ASTM D6653 tested and certified
